

M22 fittings for copper pipes and PEX pipes

- Integrated support sleeve M22 for Manifolds and accessories
- For heating and cooling systems
- Temperature: Max 100°C
- Pressure class: PN 10

Description *M22 fitting*

Area of use

The compression fitting are used for connecting copper pipes and Pex pipes to MMA manifolds and manifolds accessories.

Description

Compression fittings that are to connect copper pipes and PEX pipes to MMA Manifolds and manifold accessories.

Threading is M22x 1,5. The fitting is using conical tightetening.

Technical data *M22 fitting*

Pressure class

PN 10

Max temperature

100°C

Material

Brass

O-rings EPDM
